

The Case For EPP Endpoint Security.

GET PROACTIVE DEFENSE

EPP is proactively on the defense looking for cyber threats that are known and unknown.

Hackers and cybercriminals work relentlessly to steal your sensitive data. Level the field against cyberattacks with an endpoint protection solution.

Why antivirus is not enough.

Securing endpoints such as servers, PC's and mobile devices is critical to safeguard sensitive business data from cybersecurity attacks. Antivirus alone fails to keep pace with advanced AI generated attack methods employed by threat actors.

Strategies that include a secure Endpoint Protection Platform (EPP) with active monitoring and actionable threat intelligence are essential. EPP harnesses the collective intelligence of the Internet to deliver continuous endpoint security.

How EPP delivers.

When unusual activity is detected, EPP can quickly isolate the threat to minimize or prevent its damaging effects. EPP employs a sophisticated system of advanced response capabilities to detect and mitigate the impact of new or zero-day attacks.

The collaborative nature of endpoint security improves an organization's security posture.

The human factor.

Over 70% of cyberattacks start with an email. End-users must understand this risk and avoid threats such as phishing attempts that originate from the inbox. The human factor of cybersecurity risk can be mitigated with policy and education.

- Endpoint security takes an active approach towards securing digital assets.
- Antivirus signature-based protection simply protects individual devices.
- Endpoint security employs advanced next generation intelligence features.
- Threat detection and response are inherent to EPP solutions.
- Antivirus seeks known threats. EPP detects and blocks unknown threats.

Active Protection and Response.

GET PROACTIVE DEFENSE

EPP is proactively on the defense looking for cyber threats that are known and unknown.

Hackers and cybercriminals work relentlessly to steal your sensitive data. Level the field against cyberattacks with an endpoint protection solution.

Endpoint Security + Active Monitoring.

Triumph Connections provides the most advanced endpoint security solutions to monitor and protect your network infrastructure against cyberattacks. Our Endpoint Protection Platform safeguards your digital assets against viruses, ransomware, and online threats. We combine AI with human interaction to quickly assess threats to mitigate risk.

Remedial Action.

If we find vulnerabilities on your network or endpoints, we will assess the weakness and set a course for remediation. Our goal is to minimize your risk of exposure by reducing your cybersecurity threat surface. Decreasing your threat landscape significantly reduces the the number of attack vectors that cybercriminals can use to exploit vulnerabilities.

Cybersecurity Training.

Cybersecurity training is highly recommended for every business. Employees should have a basic understanding of risk and how their actions can impact the cybersecurity posture of their organization. Triumph Connections offers cybersecurity training that can be customized to suit the needs of any company.

Patch Management.

Triumph Connections' ability to actively monitor endpoints allows us to also deploy critical security updates and patches. As AI works to ascertain information, our team of security experts convene to interpret collective threat intelligence. Our patch management schedule is based on real-time security assessments, as well as critical updates recommended by the software developer.

Technology Advisors.

As cybersecurity and technology advisors, we assess and recommend practical security solutions to protect your digital assets. As your business evolves, we adjust our recommendations to align with your needs. In addition to EPP, we offer digital security assessments and cyber recovery planning to support your entire cybersecurity ecosystem.

Triumph Connections IT Solutions

Triumph Connections helps SMBs overcome technology challenges. Our core business focuses on implementing security first solutions that help our clients better protect their digital assets and sensitive information. We offer a comprehensive suite of IT services that allow organizations to operate securely.

In addition to cybersecurity, Triumph Connections designs and builds secure IT networks for SMBs. We integrate technology from national brands such as Cisco and Meraki, ensuring a first-class infrastructure that meets the highest standards of reliability. We are trusted advisors and support our clients who rely on us to deliver cost-effective solutions that work. Our decades of experience and dedicated team of IT professionals ensures that you can count on us to be your single point of contact for all your IT and cybersecurity needs into the future.

INDUSTRY CONNECTIONS

We are connected with major IT related companies, like Cisco, Microsoft, CDW and many more.

IT ACCOUNTABILITY

We stand by our solutions and will work with you to the end to guarantee satisfaction.

As a full service IT firm and Managed Service Provider (MSP), we provide realistic solutions to challenging technology problems everyday. We merge practicality with smart technology tools to create the perfect level of IT support.

NETWORK INSTALLATIONS

Design and build state of the art networks that use AI and smart technology to increase reliability. Every network is designed with security and long-term stability in mind.

MANAGED INFRASTRUCTURE

Triumph Connections manages large CRE/RRE projects that can incorporate a large contingent of human capital. We manage new and existing infrastructure projects to keep developers, system integrators and contractors on target.

ENTERPRISE WIRELESS

Enterprise wireless solutions must be capable of handling high bandwidth demand and security. We are experts in planning and implementing enterprise Wi-Fi solutions for multi-tenant commercial buildings and large spaces.

Triumph Connections is an Illinois based Limited Liability Company that specializes in IT solutions and cybersecurity. To learn more about our services please visit our website at www.triumphconnections.com.
